FOR IMMEDIATE RELEASE

March 31, 2010

Morefield Teams with Allworx

CAMP HILL, PA—Morefield Communications, a full-service communications technology company, recently partnered with Allworx, an award-winning developer of Internet Protocol-based (IP) phones and phone systems for small- and medium-sized businesses. As an Allworx partner, Morefield markets Allworx's product portfolio to design and install phone systems for its clients in Pennsylvania and Northern Maryland.

"We are pleased to offer Allworx products to our clients," said Michael Whiteman, executive vice president, sales and marketing, Morefield Communications. "Their powerful combination of traditional and Internet-telephone capabilities helps our clients affordably migrate to VoIP at their own pace, which is critical in today's business climate."

Allworx product portfolio supports both traditional and VoIP telephone services that can grow as technology evolves. Their complete, feature-rich VoIP and network system allows small- and medium-sized businesses to make gradual, low-cost, no-risk transitions to VoIP without any disruption to existing operations.

The Allworx product line includes the Allworx 6x and 24x systems, PX 6/2 Port Expander, and Allworx 9224 phone, Tx 92/94 Expander, 9212, and 9202 phones along with a series of software options. Their systems support phone features such as Follow-Me-Anywhere Cell Phone Integration; Consolidated Messaging; Remote User Functionality; True Line Appearances; Hands-Free Intercom; and Zoned Paging.

"Our goal is to aid in the success of our clients by providing them with the most relevant, affordable and effective technology solution," commented Whiteman. "This partnership gives us the ability to provide our clients with more options in choosing a solution that will improve productivity and decrease costs."

"Allworx solutions eliminate the compromises that businesses have had to make when transitioning to VoIP technology – offering all of VoIP's benefits, without losing any of the traditional phone features," added Whiteman. "Allworx systems are ideal replacements for the millions of aging PBX and key phone systems still used today."

About Morefield
