The ultimate viewing experience for patients

The Premium Patient Room Real Estate

- + Educate patients by providing access to **educational content**
- + **Inform** and **entertain** both the patient and visitor
- + No network needed. With **TV 2.9**, educational libraries can be stored on the TV's internal hard drive.
- + **Connect** patients to entertainment, education, internet, and more with **TV 3.0**.

The Most Cost-Effective System

- + **Future**-proof your investment
- + Unique **building block** approach allows for current and future connectivity
- + Add **functionality** as need and budget dictate
- + Enhance the patient **experience** at your own pace with:
 - MediaLink
 - MediaCare
 - Thin Client
 - InnovaTV Patient Portal (IPP)

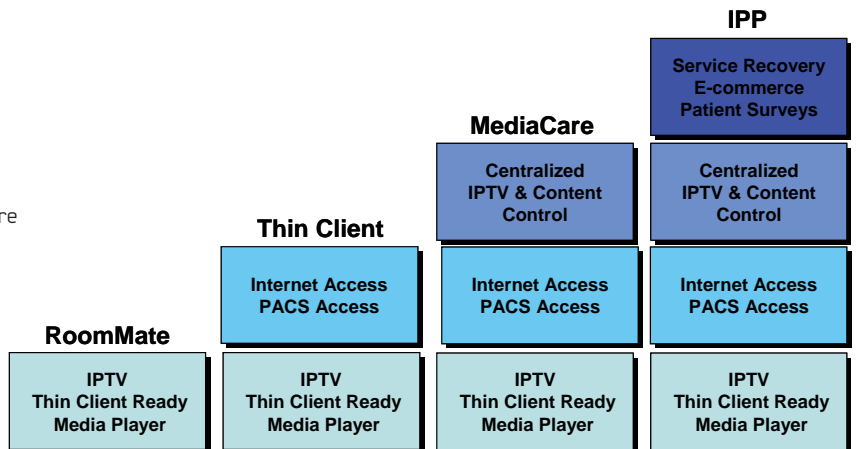

The Most Advanced Patient Room TV

Easy to use

- + **Universal** pillow speaker design
- + **One-button access** to TV, educational content, movies, internet, etc.
- + Front keypad allows staff and visitors to **access** the TV, DVD, and IPTV without disturbing the patient
- + **Beautiful** wide screen, perfect pixel, high definition LCD display with superior viewing angles
- + **Education** button for direct access to hospital education channels

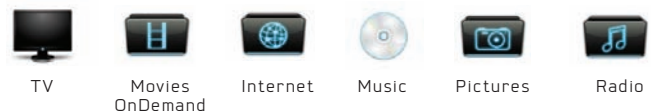

Easy to maintain

- + Upgradeable software and hardware increase the hospital's **return on investment** by ensuring the latest functionality
- + USB flash **clone** makes copying TV settings and PC storage of files easier than ever before
- + Battery-backed clock for **patient satisfaction**

The IPTV Advantage

IPTV = internet protocol television. HCI's RoomMate IPTVs have a unique built-in media player. Side USB ports allow staff and visitors to **share** digital photos, music, and videos with patients. Optional built-in hard drives and flash memory allow for storage of **educational** and **entertainment** content. And, because HCI's IPTVs come standard with built-in ethernet capabilities, patients can access content and the **internet** across a simple network. Educational videos and discharge instructions can be prescribed for patient viewing, and PACS images can be viewed, enabling in-room consults between doctor and patient. Video on Demand is made **simple** with the RoomMate IPTV.

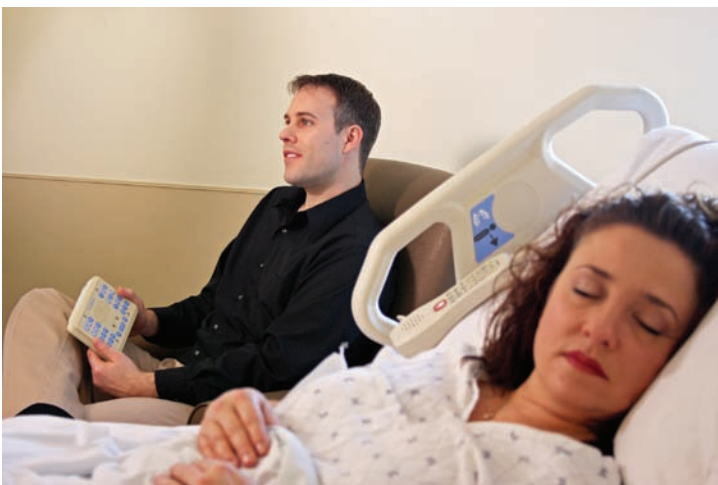

More innovation

Pillow Speakers and Keyboards

HCI offers custom pillow speakers and keyboards that **integrate** with stand-alone IPTVs or networked solutions. For patients to utilize the full gamut of **IPTV** options, HCI recommends using both an HCI pillow speaker in conjunction with the HCI keyboard. Both the custom pillow speaker and keyboard offer:

- + channel control
- + volume control
- + easy access to DVD
- + easy access to IPTV functions, including the internet.

HCI pillow speakers and keyboards are easy to clean and made for the hospital environment.

HCI Visitors Station

There are times when the patient is sleeping, needs assistance with the TV, or cannot access the pillow speaker. **Visitors** can control channels, volume, DVD player, radio, and access on-demand content from the Visitors Station. This device can be mounted in a wall or on a table top and offers the same functionality as the pillow speaker or TV's front button keypad. Visitors can be entertained and educated from the **convenience** of their chair.

Other RoomMate Complements

HCI makes wall, ceiling, and table **mounts** for use with RoomMate IPTVs. HCI also makes its own hospital-grade DVD player, which can be fully integrated with the pillow speaker, keyboard, remote, visitors station and TV front keypad.

Other RoomMate **complements** include networked solutions:

MediaLink provides patient access to video on demand, educational videos, music and photos via RoomMate IPTV.

MediaCare provides patient entertainment and education access and the ability for staff to prescribe videos, send messages, and control TV functions.

Thin Client allows patients to access computer applications, like the internet and games.

InnovaTV Patient Portal includes service recovery, gift shop, and discharge information for patients.

The RoomMate Family

Available in 22", 26", 32", and 42"
